DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to a moiré-removing filter for attenuating or removing a predetermined spatial frequency component liable to cause moiré appearance.
- II. Claims 8-13, drawn to an edge-emphasizing spatial filter with a flat characteristic in an erroneous-judgment frequency band containing spatial frequencies liable to cause an edge extraction error.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for removing moiré patterns from an image and not performing edge enhancement and invention II has separate utility such as for performing edge enhancement in an image and not removing moiré patterns. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
